

Dear Mr. Charles Terreni,

I am writing in regards to net metering (docket # 2005-385-E). I would like to see the state of South Carolina begin to use net metering. I believe this would sway many people's decision to buy solar power systems which would help our environment. Also, considering that Duke Energy had problems keeping up with the consumption of power due to air conditioning this past summer, I believe it would alleviate power shortages. Please help South Carolina become a more environmentally friendly state and adopt net metering. Thank you for your attention in this matter.

Sincerely,

Amber Hill
